

Tempered Glass Waiver
Releasing *Altitude Window Cleaning Inc.* From Any Liability On
Tempered Glass Scratching During Cleaning

Due to widespread problems with poor quality tempered glass scratching during construction window cleaning, Altitude Window Cleaning Inc. will not be liable for any scratches on any tempered or heat strengthened glass.

It is accepted and understood by ALL parties that properly used razor blades and scrapers are standard tools and techniques for construction window cleaning and can safely remove limited amounts of construction debris (plaster, paint, texture, tape, stickers, caulking, silicone etc.) from quality glass, without scratching the glass surface.

Where possible, other methods of debris removal will be offered by Altitude Window Cleaning Inc. to remove construction debris from any glass surface. Furthermore, it is accepted, the use of razor blades and scrapers will be employed on all construction window cleaning where necessary.

If the Builder does not choose to have window cleaner use razor blades or scrapers, the Builder must cover all glass during entire construction process, which would protect glass from any construction debris and eliminate the need for Altitude Window Cleaning Inc. to use razor blades and scrapers to clean the glass.

Additionally, Altitude Window Cleaning Inc. cannot confirm or deny the presence of scratches on the surface of the glass or the condition before or after the construction window cleaning.

This clause must be included on all contracts. If this clause is not acceptable, there is no contract between Altitude Window Cleaning Inc. and the Builder.
